RE: ML 42844-Clay; Request For Mine Survey

CERTIFIED MAIL NO. P 959 217 989

Gentlfolk,

Article XII of the terms and conditions of trust lands mineral leases ML 42844 requires that the Lessee maintain accurate and detailed maps of all actual and planned operations on a scale of not more than 50 feet to the inch, with points coordinated with public land surveys showing distance to the nearest public survey monument or established survey corner.

Such maps or plats must show the mine workings from time to time, as the same are extended. All surveys must be conducted by a licensed surveyor or engineer qualified to practice in Utah and must be certified by the surveyor or engineer preparing the survey. The State or any agency of the State is entitled to a true and correct copy thereof.

The Trust Lands Administration has not received an updated copy of your detailed maps of all actual and planned operations and mine workings upon the lands within mineral lease ML 42844. The Trust Lands Administration hereby requests that you immediately, within the next fifteen days, submit a current copy of such maps prepared and certified by a licensed surveyor or engineer qualified to practice in Utah.

Failure of the Lessee to comply with this request shall be a breach in the terms and conditions of Article XII and may subject the lease to cancellation.

Sincerely,

John T. Blake
Mineral Resources Specialist
